WanderVision - Evaluation Report

Generated: 2026-10-10 14:29 · LLM provider: anthropic

1. Retrieval ablation (14 labelled queries, top-10)

Configuration	P@5	P@10	MRR	nDCG@10	p50 latency (ms)
keyword (BM25)	0.643	0.643	0.786	0.762	10.1
dense (MiniLM)	0.514	0.521	0.705	0.727	13.6
hybrid (RRF)	0.629	0.586	0.854	0.861	21.5
hybrid + cross-encoder rerank	0.7	0.721	0.841	0.862	575.1

2. Preference classification (20 labelled queries, classifier: lexicon)

Metric	Value
travel_type_accuracy	1.0
top_dims_recall	1.0
days_accuracy	1.0
budget_accuracy	1.0
tier_accuracy	1.0
month_accuracy	1.0
absent_accuracy	1.0

> Caveat: these cases were written alongside the keyword lexicon, so offline-classifier scores are optimistic. Treat them as a regression suite; unseen phrasings will score lower (the LLM classifier exists to cover them).

3. Guardrails red-team

Metric	Value
Attack block rate	1.0
Block-category accuracy	1.0
Benign pass rate	1.0
Benign queries with PII redacted	2

4. End-to-end plans, offline rule-based mode (8 scenarios, judge: heuristic): secondary regression suite

> The rule-based judge is lenient by design. The primary quality evidence is the Claude-judged section (5b) and DeepEval (5).

Metric	Value
mean_judge_score	4.7
pass_rate	1.0
mean_citation_coverage	1.0
within_budget_rate	1.0
preference_coverage	0.959
latency_ms_p50	2408
latency_ms_max	2739

Query	Destination	Judge	Citations	Budget	Latency (ms)
A couple wants a 5-day trip focused on beaches, sightseeing and local ...	Bangkok	4.8	1.0	feasible	2739
Family of 4 with two kids, limited budget of $2500, 6 days, want highl...	Kerala	4.8	1.0	feasible	2365
Solo traveler from Europe, 7 days in October, loves hiking, nature and...	Kerala	4.4	1.0	unknown	2506
Group of 4 friends, 5 days of nightlife, beaches and street food in Ma...	Phuket	4.8	1.0	feasible	2512
Luxury honeymoon with spa and beaches for 6 days in February, budget 8...	Maldives	4.8	1.0	feasible	2450
Retired couple, 8 days of culture, museums and food in Europe in May, ...	Paris	4.8	1.0	feasible	1676
Business traveler with 3 free days in Tokyo, wants food and culture...	Tokyo	4.6	1.0	unknown	607
3 friends, adventure and nature, 9 days in January, flying from Oceani...	Cape Town	4.6	1.0	feasible	2254

5. DeepEval (LLM-as-judge)

Judge model: anthropic/claude-opus-5-5 · 6 test cases

Metric	Mean score	Pass rate
Recommendation quality [GEval]	0.567	0.5
Answer Relevancy	0.996	1.0

Metric	Mean score	Pass rate
Contextual Relevancy	0.768	1.0
Faithfulness	1.0	1.0

5b. Claude-mode plans, judged by Claude (6 scenarios): the primary quality evidence

Query	Destination	Judge	Passed	Revisions	Citations	Budget	Latency (s)
A couple wants a 5-day trip focused on beaches, sightseeing …	Phuket	3.6	True	0	0.857	feasible	118.1
Family of 4 with two kids, limited budget of $2500, 6 days, …	Kerala	3.6	True	1	1.0	feasible	140.2
Luxury honeymoon with spa and beaches for 6 days in February…	Maldives	3.2	False	1	1.0	feasible	86.9
Solo traveler from Europe, 7 days in October, loves hiking, …	Kerala	3.6	True	0	1.0	unknown	89.5
Group of 4 friends, 5 days of nightlife, beaches and street …	Phuket	3.8	True	0	1.0	feasible	67.0
Retired couple, 8 days of culture, museums and food in Europ…	Paris	3.6	True	1	1.0	feasible	67.3

Summary: mean judge 3.57 / 5, 5 of 6 approved, mean citation coverage 0.98, 3 revisions used. Cumulative estimated spend for these plans and DeepEval: $2.457 (list-price estimate).

Claude-mode end-to-end runs (judge scores, revision loop, critiques) are recorded in `eval/results/LLM_Mode_Runs.md`.

6. Suitability model (held-out 20%)

Model	AUC	Accuracy
Gradient-boosted trees	0.9179	0.8477
Logistic regression baseline	0.9135	0.8535
Majority class	-	0.6999
